# WEATHER-SAFE II

## In-Use Receptacle Covers

Our second generation of while-in-use receptacle covers—our Weather-Safe II—is not only designed to protect against some of the harshest weather conditions, but to reduce installation time as well.

Available in three sizes—two 1-gang depths—standard or deep—and one 2-gang in a standard depth

- **Horizontal or vertical orientation:** Our two 1-gang in-use covers are designed to mount either horizontally or vertically, allowing you to reduce the number of covers that you might normally stock.
  - **No tools required:** All of our in-use receptacle covers are provided with individual snap-on inserts. There is no need to cut away those confusing, time-consuming punch-outs that come standard with competitive units.
  - **Snap-on inserts:** Each 1-gang in-use cover comes with an individual duplex and an individual GFI snap-on insert. Plus, a toggle and four different round receptacle openings that attach to one another in a building-block fashion. Easy to attach and, again, no labor intensive cutouts. 14 different configurations.
- Our 2-gang in-use cover provides up to 31 different configurations.
- **Faster Installation:** Select the insert that you require and simply snap it on over the wiring device. Attach our in-use cover and you are done. Comes with a pre-glued gasket so you don't waste time mounting a separate gasket to the box. And our lid is easy to attach or to remove in case you need to change your mounting orientation.
  - **Testing/Code Compliance:** All of our in-use receptacle covers are UL Listed and meet the requirements for a NEMA 3R rating. They also comply with the 2002 NEC Article 406.8 (B) (1) for receptacles in damp or wet locations.

## Additional Product Features...

Clear lid made from rugged UV-resistant polycarbonate

Cover is easy to remove to change the orientation or access the box

Pre-glued gasket speeds installation time

Easy to open and close latch with locking hasp

No tools required for these easy-to-remove side cable ports

Extra wide port openings allow room for up to a 12 AWG cord

Unlike other covers, Weather-Safe II lets you change the orientation by closing up the opening you don't need and reattaching the cover. You can also change any of the snap-on inserts. Other covers have break-off inserts that cannot be put back together.

## Installation as easy as 1-2-3

Simply snap on the insert over the device.

Fasten base to box with four screws.

Snap on cover.

Bringing you quality weatherproof products for over 50 years...

Mulberry has been designing and producing weatherproof boxes and covers since 1965. Our weatherproof products are specifically designed to protect outdoor electrical connections and wired receptacles from rain, sleet and snow.

All of our weatherproof products are well-built and many come with patented design features that assure faster, easier installation.
